Module D2—Leximancer Next Steps

Overview

Purpose
This module is designed for people who are familiar with using Leximancer and want to take their skills to the next level. It builds on the concepts taught in Introduction to Leximancer. This one-day course will cover advanced topics, such as profiling and the interpretation of results. Participants will have the opportunity to conduct guided work on their own data and projects.

Learning objectives
On completing this module, participants will have a greater understanding of more advanced aspects of analysis using Leximancer including:

1. Seeding concepts
2. Profiling
3. Interpreting results

Who should attend, and module pre-requisites
This module is designed for people who are familiar with using Leximancer. Participants must have completed Introduction to Leximancer, or have a basic knowledge of Leximancer and be able to import data, make changes to settings and generate concept maps.

Topics covered

Session 1
a) Seeding concepts
b) Profiling
c) Interpreting results

Session 2
d) Working on your data
